

Wheelmelt

Table-Top Hotmelt Hand Gluer

Application

The Wheelmelt is a Hotmelt Glue Wheel-In-Pot applicator. It is very quick and simple to operate, and is quickly adjusted to accommodate a wide range of carton sizes. Special attachments can be fitted to do individual jobs such as envelope sealing. The Wheelmelt is one of the most versatile and multi purpose hand gluers available. It is often used for "get you out of trouble" applications, pilot launches, low speed production or resealing. The machines are easily transported, and are used in industries throughout the world.

Features include

- Single phase 220...240 Volt, 50 Hz, 1 000 Watt
- Safety cut-out switch on gluepot motor
- Temperature control on gluepot from 0...249° C
- Doctor blade for controlling the amount of glue on wheel
- Glue application width 3 mm
- Seals flaps from 15 mm to 300 mm deep, up to 450 mm wide
- Machine size 400 mm long x 400 mm wide x 200 mm high
- Machine weight 22 kg approx.
- Speed - approx. 20 ends per minute (depending on operator dexterity)
- Tank content 3 litres, uses raw chips of hotmelt glue
